## **To Whom It May Concern**

I am pleased to be writing this letter of recommendation for Mr. Yash Gupta.

I had the pleasure of interacting with Mr. Gupta for a period of eight months as his Project Leader while he worked as a QA Engineer at a project of Join the Food Family Ltd, Tanzania, a subdivision of Josera GmbH & Co. KG, Germany. Mr. Gupta was reporting to me directly while he worked on the Kulisha Ng'ombe Project, a Ration Calculation and Customer Administration Tool to help local businesses and local farmers in Tanzania.

Mr. Gupta has a mixture of technical expertise as well as communication skills which is quite rare among most industry professionals today. Within the first few weeks of joining the team, he was able to distinguish himself as an essential member of the team, analysing and developing the most complex business requirements. Everyone in the senior management quickly came to rely on his judgment regarding implementation strategies and execution processes. His love for the work was evident from the fact that he never shied away from putting in long hours and extra efforts to get his tasks completed.

Mr. Gupta is an ambitious person and is indeed a pleasure to work with. I myself was time and again inspired by his positive outlook and never say die attitude. He is also a team player who inately understands that a team can collectively achieve much

more than any individual effort. His approachable personality and excellent communication skills instantly make him stand out as a leader in any group.

I would not hesitate to say that Mr Gupta is among the brightest of freshers I have interacted with, over my industry experience. I am confident that Mr. Gupta will continue to excel just as he has done in the workplace. His sincerity and zeal make it almost a given that he will be a valuable new admission into the Technical Department. I wish him unbounded success in his professional career and future endeavours.

I would be happy to provide additional information about Mr. Gupta's personal and professional capabilities if required.

Sincerely

Timo Schaefer,

Project Leader

JoseraGmbH & Co. KG, Germany
